

LightPro IN1146 LED Projector by InFocus

LightPro

The **LightPro IN1146** ultra-mobile widescreen projector turns the heads of expert projector reviewers with its paperback book size, high connectivity, 1000-lumen brightness, 30,000-hour LED light source and low, low price.

TOP TECH REVIEWERS LOVE THE IN1146:

PC Magazine: "Editors' Choice"

"[IN1146] Stands out for its balance of features, price, and image quality. The combination puts it a cut above the competition overall and makes it our Editors' Choice for LED WXGA projectors."

"One advantage for the IN1146 is its low price. Another is its size and weight... it's the lightest model in this [LED WXGA] group and easily the smallest."

Projector Central: "Highly Rated"

"The new InFocus IN1146 is an ultraportable presentation projector that is packed to the gills with features... Combines adequate brightness, small size, and connectivity with an instant-on, hassle-free LED light engine to create a projector that's powerful enough to get the job done."

rAve: "Best of InfoComm"

"This thing is small enough that I personally would call it a pico projector. The difference is that unlike your average anemic pico projector, this thing puts out 1000 LED lumens with 1280x800 DLP."
